

PROCESS FOR PREPARING MONODISPERSE ANION EXCHANGERS

ABSTRACT OF THE DISCLOSURE

The present invention relates to a process for preparing novel, monodisperse anion exchangers by

- (a) reacting monomer droplets made from monovinylaromatic compounds and polyvinylaromatic compounds, and optional porogens and/or initiators,
- (b) amidomethylating the resultant monodisperse, crosslinked bead polymers with phthalimide derivatives,
- (c) converting the amidomethylated bead polymers to aminomethylated bead polymers, and
- (d) alkylating the aminomethylated bead polymers.
